

Audit services

Contract compliance and revenue assurance audits for the media industry

Why audit with SymphonyAI Media?

We deliver the revenue verification content owners need to improve financial transparency in today's evolving media landscape.

We ensure that the distribution of content is consistent with the terms and conditions of distribution agreements and that these agreements are performing to a content owner's full expectations.

Our contract compliance, subscriber and transactional audits encompass MVPD platforms, satellite TV, Internet Protocol TV (IPTV), streaming services and over-the-top (OTT) platforms.

We expertly and comprehensively cover distribution and payment complexity for broadcast and cable television, premium and digital services including VOD movie and event transactions, transactions for music and gaming platforms, and digital licensee agreements for physical content.

Our audit footprint covers North and Latin America, Europe, and Asia.

What does a SymphonyAI Media audit deliver?

- › Detailed subscriber and transactional revenue verification and reconciliation
- › Post-audit support of audit findings until an audit is satisfactorily resolved
- › Detailed platform-based audit reports for satellite, traditional linear cable, IPTV, and over-the-top (OTT) distribution platforms

What can you expect from a SymphonyAI Media audit?

Auditor independence to the distributor and content owner

Audit fees are retainer-based or project-based. We are not compensated based on audit findings, or on any other type of contingency basis agreements

All audits performed in accordance with the Generally Accepted Audit Standards (GAAS) as prescribed by the American Institute of Certified Public Accountants (AICPA)

All information and data provided to SymphonyAI Media by an operator and content owner during and after an audit is maintained under strict confidentiality
